

7.2. University measures towards affordable and clean energy

7.2.3. Carbon reduction and emission reduction process

Energy-saving devices

Description:

Faculty of Psychology uses energy-efficient electronic devices, such as LED lamps that needs less electricity, fans in some rooms to reduce freon usage, using energy-efficient air conditioners and refrigerators. We also use HVAC, which is an integrated system of heating, ventilation, and air conditioning systems. This HVAC tends to be more energy efficient and friendly to the environment than other equipment/devices. Using these energy-saving devices, Faculty of Psychology hopes to reduce our carbon emission we produce.

Faculty of Psychology mostly used energy-efficient electronic devices:
