

SDG 15: LIFE ON LAND

15.3 Supporting land ecosystems through action

15.3.3 Local biodiversity included in planning and development

Local biodiversity included in planning and development Include local biodiversity into any planning and development process (e.g. construction of new buildings)

Description

The Vocational Education Program consistently guarantees the implementation of policies for conservation, restoration and sustainable use of terrestrial ecosystems, especially forests, mountains and dry lands, as well as local biodiversity including in planning and development and involving local biodiversity in every planning and development process (for example the construction of new buildings). Implementations carried out by the Vocational Education Program include closing the upper motorbike parking area to make it an open green space. Apart from that, repair areas that are overgrown with weeds, become green open spaces.

Before

After

Closing the upper motorbike parking area to make it a green open space

Utilization of wild grass into green open space
